**After inhalation exposure:** Remove the victim to fresh air. Consult a doctor, if disturbing symptoms occur.

**After skin contact:** Wash off immediately with water and soap and rinse thoroughly. If irritation persists, seek medical attention.

**After eye contact:** Remove contact lenses (if any). Immediately flush eyes with large amounts of water for at least 15 minutes while holding the eyelids open to ensure that the entire surface is flushed. The victim should be immediately placed in a specialist medical facility.

**After ingestion:** Rinse mouth with water (not for use by people unconscious). Contact doctor immediately if status of a person is serious or if symptoms persist. Do not induce vomiting.

**4.2. Most important symptoms and effects, both acute and delayed**

Repeated or prolonged contact with the skin may cause sensitization or irritation.
